DETAILED ACTION

1. The amendment filed 03 January 2005 is acknowledged and has been entered.
2. The Declaration under 37 C.F.R. 1.132 is acknowledged and has been entered.

Election/Restrictions

3. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 22-24, drawn to a method for producing denatured lipoprotein.

Group II, claim(s) 27-29, drawn to a method for producing a stabilized denatured lipoprotein.

Group III, claim(s) 32-34, drawn to a method for producing stabilized denatured lipoprotein.

Group IV, claim(s) 25-26, 52, and 55, drawn to a denatured lipoprotein.

Group V, claim(s) 30-31, 53, and 56, drawn to a stabilized denatured lipoprotein.

Group VI, claim(s) 35-36, 54, and 57, drawn to a stabilized denatured lipoprotein.

Group VII, claim(s) 37-41, drawn to a method for determining denatured lipoprotein in a sample.

Group VIII, claim(s) 42-46, drawn to a method for determining denatured lipoprotein in a sample.

Group IX, claim(s) 47-51, drawn to a method for determining denatured lipoprotein in a sample.

4. The inventions listed as Groups I-IX do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The technical feature linking Groups I-IX appears to be a denatured protein produced by freezing a solution containing lipoprotein and melting the frozen solution.

However, Belzner et al (US 3,632,473) teach freezing and quick thawing of plasma to denature lipoproteins. See column 6, lines 54-65.

Therefore, the technical feature linking the inventions of Groups I-IX does not constitute a special technical feature as defined by PCT Rule 13.2, as it does not define a contribution over the prior art. Accordingly, Groups I-IX are not linked by the same or a corresponding special technical feature as to form a single general inventive concept.

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
